

To Whom It May Concern,

Over the past several years, we have been at the forefront of innovation. We have engineered new solutions, and technology based solutions to help protect and help you keep your venues, campuses, stadiums, hospitals, buildings, businesses, and communities safe.

*TripleShield*® is our Proprietary Silicone Quaternary Zetrisil® based solution . It is the first of it's kind approved and rated by the FDA to kill the COVID-19 virus on surfaces. *TripleShield*® is also rated to kill and protect against bacteria, viruses, and molds while being eco-friendly, non-transdermal, and non-toxic. The killing mechanism of Zetrisil® occurs through an electromechanical process rather than chemical, thereby eliminating the risk of creating hard to kill pathogens that survive chemical killing processes.

We understand that every site is in a unique position when compared to others. Each site's identity and culture depend on the success of how it is managed.

That being said, we know that *TripleShield*® products can help your facilities management and engineering team in keeping the whole community safe while *keeping the doors open*.

The *TripleShield*® product may be applied to any surface and is rated to protect against a wide range of microbial threats for up to 28 days. *TripleShield*® kills within 15 seconds compared to the current products on the market. Surfaces sanitized with *TripleShield*® only need to be retreated once a month!

This extended duration of effectiveness will allow you to focus less on the constant re-sterilization and treatments of your entire site. You will be able to focus more on high risk, high traffic areas. Less commonly used facilities only need to be treated once a month.

*TripleShield*® liquid + gel hygiene products also contain the Zetrisil® formula. When *TripleShield*® liquid + gel hygiene is used on your hands, it creates a long lasting nano-protective barrier that remains active up to 24 hours.

We also offer many other access control solutions, please take a look:
